External Security Configuration Assessment

LOCAL QA — ӘҒҚҢӨҰҮҺІ / Финальная проверка partial

Security Snapshot

Generated: 2026-10-24 17:35 UTC · Report: dac4dc32-267a-4f48-8129-b8aa4dacef2f

Policy: starter-risk-1 · assessment-2

Limited external configuration assessment

This is a limited external configuration assessment, not a penetration test, compliance audit or guarantee of safety. Missing, failed or stale checks do not prove security. Human task completion is not technical resolution.

Executive summary

Saved evidence is available for 1 of 2 enrolled domains. Assessment status: Incomplete. Findings below describe only the observed scope.

Coverage and recorded findings	Count
Currently authorized domains	1
Unverified or expired domains	1
Domains with usable saved evidence	1
Domains without usable evidence	1
Domains with stale evidence	0
Historical findings excluded from assessed scope	0

Top priorities

No supported findings in the assessed scope. This does not mean no security risks exist.

Scope and method

Only authorized domain names and saved, supported observations are assessed: DNS email-record context, TLS certificate trust/renewal, and root HTTP/HTTPS responses and selected headers. Observation times differ from the report creation time. Failed, inconclusive and unrecorded checks remain gaps, not successful checks.

Excluded: internal networks, malware detection, account auditing, exploitation, port sweeping, continuous monitoring and compliance certification. Current domain proof does not establish permission for every service behind a domain.

Domain	Scope status	Last collection (UTC)
partial-0.example.com	Evidence available Partial	2026-10-24 17:35 UTC

Domain	Scope status	Last collection (UTC)
partial-1.example.com	Current ownership proof required Not checked	Not checked

Remediation work

Human task status does not determine finding resolution.

No tasks in the assessed scope.

Reading this assessment

A finding is a supported configuration condition, not necessarily an exploitable vulnerability. Severity and priority come from the recorded policy; no CVSS score or CVE is invented. Inconclusive means evidence was insufficient. Stale means the observation may no longer describe the current configuration. Only a later comparable check confirms resolution.

This is a limited external configuration assessment, not a penetration test, compliance audit or guarantee of safety. Missing, failed or stale checks do not prove security. Human task completion is not technical resolution.

Appendix: saved check inventory

Protocol identifiers, evidence values and source references below are preserved exactly. Empty values are not a claim of safety. References identify records inside the authenticated workspace; they grant no public access.
